

Provider Communication

Subject: Children's Intervention Services program	Priority: High
Date: March 5, 2004	Message ID:

Dear Medicaid Provider:

There are several changes to the Children's Intervention Services program that are effective 4/1/2004. The time associated with Procedure Code 92507 has been eliminated to reflect the accurate HIPPA definition; therefore, one (1)-unit equals one (1) visit. The allowable units for the fifteen (15) minute procedure codes have changed. The new limit will be 20 units per month or a combination of 20 units per month. Occupational and Physical therapy reevaluations will be limited to 1 per 6 months. Please review Part II, Policies and Procedures, Chapter 1000 in the April 2004 manual for all changes in the maximum allowable units. Also, providers will be notified when to implement the new HIPAA codes via Banner Message. Thank you for participating in the Medicaid program.

Sincerely,

Department of Community Health
